

MileStone 4 Progress Update for I.Helpr

Project Name: I.Helpr

Ji Won Choi	student # 111230163	jiwon.choi.2@stonybrook.edu
Sujeong Youn	student # 111290244	sujeong.youn@stonybrook.edu
Pyungkang Hong	student # 110054399	pyungkang.hong@stonybrook.edu

Course: CSE 416

Date: 11/24/2020

1. Group Progress Update:

Functions we have built:

- Sign up
- Sending messages between parents and sitters (View, send, mark as read)
- Postings (Update, post, delete)
- Displaying unread messages
- About page
- User inquiry page (posting question, viewing question details)

Functions need to be established:

- Search (with title & filter) - integration to models.py
- View message history (view / delete) - ongoing
- Leave reviews and ratings
- View my reviews and ratings
- View my post records and edit & delete
- Manage my application for sitter user

We're a little behind schedule, because some features are not perfectly implemented right now.

Working on the use cases we had to finish previously(backlog) took time so it caused the schedule delay.

However, we are catching up on it. We are having more team meetings to discuss the schedule and works, and we are planning to finish the left use cases by this week. Next week, we will focus on fixing minor issues.

2. Updated schedule:

Lnk to our trello: <https://trello.com/b/L58qOdgr/schedule-for-the-project>

We have updated our schedule for the remaining semester on trello.
