## **1. Group Progress Update**

- So far, we don't have severe issues. However, our team feels like we are behind the schedule. Our team spent a lot of time connecting databases on heroku with the django framework so we are considering using MariaDB. We are planning to follow up the use cases that we couldn't work last week right after the midterm exam on Thursday and try to finish it by 11/9.

## **2. Update schedule**

- We are going to keep tracking and manage our schedule through Trello.

- Posting questions on QnA page has been implemented.
